❑Introduction

- "محطتك" is an innovative smart application that aims to enhance the Alexandria Metro commute experience by offering easy and fast online ticket booking services. The application provides a practical solution for users to avoid congestion and long queues, and it also allows them to track train schedules, view stations, and plan their journeys seamlessly.

- The " محطتك " app seeks to facilitate citizens' daily commutes by offering a simple user interface and a variety of services that meet the needs of metro passengers in Alexandria. The app is not just a booking tool; it is a comprehensive platform for improving the public transportation experience and making it more efficient and organized.

🚉 Development Journey of " محطتك" in the Egyptian Market

1 Needs & Market Demand

High demand for smart transport apps in Alexandria due to traffic congestion and metro crowding

2 Challenges in Egyptian Market

Weak infrastructure and varied device quality tackled by using lightweight, efficient technologies.

3 Localized Design

Arabic UI and simplified booking process tailored to local user behavior and culture.

4 Digital Transformation

"Mahattak" supports Egypt's digital shift by modernizing public transport services.

Growth Stages of "Mahattak" App

Market Research

Studied metro user behavior in Alexandria and identified key transportation issues.

App Concept & Planning

Designed a localized solution to streamline metro booking and real-time updates.

Technical Development

Built a lightweight app optimized for low-to-mid range smartphones.

User Testing & Feedback

Collected real user feedback to improve booking, navigation, and UI simplicity.

Launch & Expansion

App released in Alexandria with future plans to expand to other Egyptian cities.

Understanding and Integrating Egyptian User Culture

Local Behavior Patterns

The app respects daily commuting habits in Alexandria, including peak times and common metro usage trends.

Language & Accessibility

Designed primarily in Arabic to ensure clarity, especially for users unfamiliar with digital services.

Trust & Simplicity

Booking and payment systems were simplified to suit cultural expectations of ease and trust.

Social Impact

Encourages organized travel, reducing stress and chaos in public transportation—aligning with values of community welfare.

Support & Communication

In-app customer support follows local etiquette, using polite and respectful language tailored to Egyptian norms.

Innovative Solutions

Smart Booking System

A user-friendly system to reserve metro seats in advance to reduce congestion and waiting times.

Real-time Train Tracking

Users can see train locations and delays using integrated GPS and data from metro authorities.

AI-based Route Suggestions

The app suggests the best routes and times based on historical traffic and train data.

Eco Mode & Green Awareness

A feature promoting sustainable travel by showing users their carbon footprint savings.

1 The value of the project and the problems it will solve

The value of the project and the problems it will solve for the :-

- Egyptian people
- the Egyptian government
- the Public Transport Authority

1-Egyptian people

Problems Solved:

- ❑ Long Queues and Wasted Time Especially during peak hours, paper ticketing is slow and frustrating.
- ❑ Lack of Travel Planning Tools No way to check availability, schedules, or make multi-modal connections easily.
- ❑ Limited Access for the Disabled or Elderly Traditional systems are not user-friendly for vulnerable groups.

EgyptToursPortal.Com

Benefits:

- ❑ Convenient e-ticketing
- ❑ Real-time schedule updates and seat availability info.
- ❑ Secure digital payments
- ❑ Loyalty or discount systems could be integrated for students, elderly, or regular users.

2-The Egyptian government

Problems Solved:

- ❑ Lack of Digital Integration in Public Services Public transportation remains under-digitized compared to global smart city standards.
- ❑ Difficulty Tracking Subsidies & National Transport Policies.
- ❑ Accuracy of ticket revenue collections' government always faces problems when collecting revenues. There is some money, and it is not known where it went

Benefits:

- ❑ Supports Egypt’s Digital Transformation Strategy (Vision 2030)
- ❑ Enables data-driven decision-making in urban planning and infrastructure investments.
- ❑ Increases government revenue transparency and tax compliance through digitization.
- ❑ Facilitates social welfare policies, e.g., targeted subsidies or transport discounts via digital ID integration.

3-The Public Transport Authority

Problems Solved:

- ❑ **Manual Ticketing Inefficiency Paper-based or fragmented systems slow down operations and increase administrative burdens.**
- ❑ **Revenue Leakage Cash-based systems are prone to errors, fraud, and underreporting of revenue.**
- ❑ **Data Blindness Without digital tools, it's hard to monitor passenger volume, route usage, peak times, or plan improvements.**

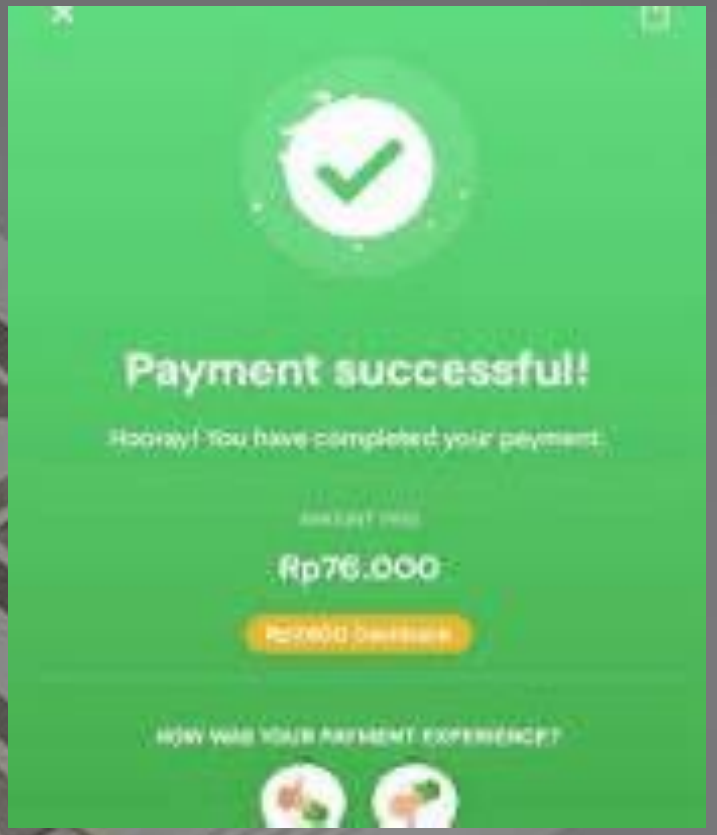
Public Transport Authority

Benefits:

- ❑ **Automated, real-time ticketing system helps optimize route planning and fleet management.**
- ❑ **Digital dashboards: for tracking ticket sales, crowd levels, and station usage.**
- ❑ **Better customer service: with instant support, refunds, or rebooking options.**

1.Political Policies

Government Regulations on Digital Payments: since the Egyptian government supports mobile payments or partners with fintech companies, our app can offer smooth digital ticket purchases.



Public Transport Policy and Investment: If the government expands metro and bus networks or invests in smart transportation systems, your app becomes even more valuable.

2. Legal Policies

Employment & Labor Laws:
Our app might need customer service reps, developers, and marketing staff. You must follow Egypt's labor laws on wages, contracts, and working hours.

Tax Regulations: Your app may generate income through service fees or partnerships. You'll need us to follow local tax rules.

3.How Geographical Influences Affect Our App

Urban vs. Rural Transportation Access: cities like Cairo, metro and bus networks are dense, but rural or suburban areas may lack easy access.

City Layout & Traffic Patterns: Egypt's cities have complex, crowded layouts. Knowing which stations are busiest at what time helps optimize the user experience.

What legal directions should be taken in order to implement “) ?”محطتكLegal implementation)

A. Operational Concerns

1-Government Partnerships

- ❑ Official government approval. Conclude a partnership agreement with the Ministry of Transport and relevant public authorities. Public-private partnership.

2-Local Regulations

- ❑ The company's compliance with Egyptian e-commerce laws, data protection laws, and consumer rights laws.

3-Licensing and Permits

- ❑ All legal licenses must be obtained.

B. Strategic Concerns

1-Country of Origin and Local Content

- ❑ The Egyptian government strongly supports local content development.
- ❑ This means:
  - Hosting data on local servers .
  - Employing Egyptian developers and staff.

2- Marketplace Behavior

- ❑ Egypt regulates electronic payments, public pricing, and advertising.
- ❑ All public-facing messages must:
  - Comply with Arabic language standards .
  - Be transparent about pricing and policies (no hidden fees).

3-Legal Jurisdiction

- ❑ This project operates in the Egyptian state and in partnership with the Egyptian government and will therefore be in compliance with the laws of the Egyptian state.

C. Intellectual Property Rights (IPR)

1-Local intellectual property registration

- ❑ Register the application name, logo, and trademark with the Egyptian Patent and Trademark Office.

2-Work with Government IP Frameworks

- ❑ Obtaining the necessary licenses from the government.

3- Preventing Misuse

- ❑ Since it's tied to public infrastructure, piracy and cloning could be serious. Work with Egyptian cybersecurity bodies (like CERT-EG) to monitor and report misuse.

ARROW
INFOGRAPHICS

Advertising

Targeted Ads: Use Google, Meta (Facebook, Instagram) to reach urban commuters .
Seasonal Campaigns:
Special offers during holidays and tourist seasons .
Influencer Partnerships: Collaborate with travel influencers to boost brand visibility.

Marketing

Referral Programs: Reward users for inviting friends .
First-Ride Discounts:
New users get 50% off their first metro ride .
Content Marketing: Share user stories and metro travel hacks on social media.

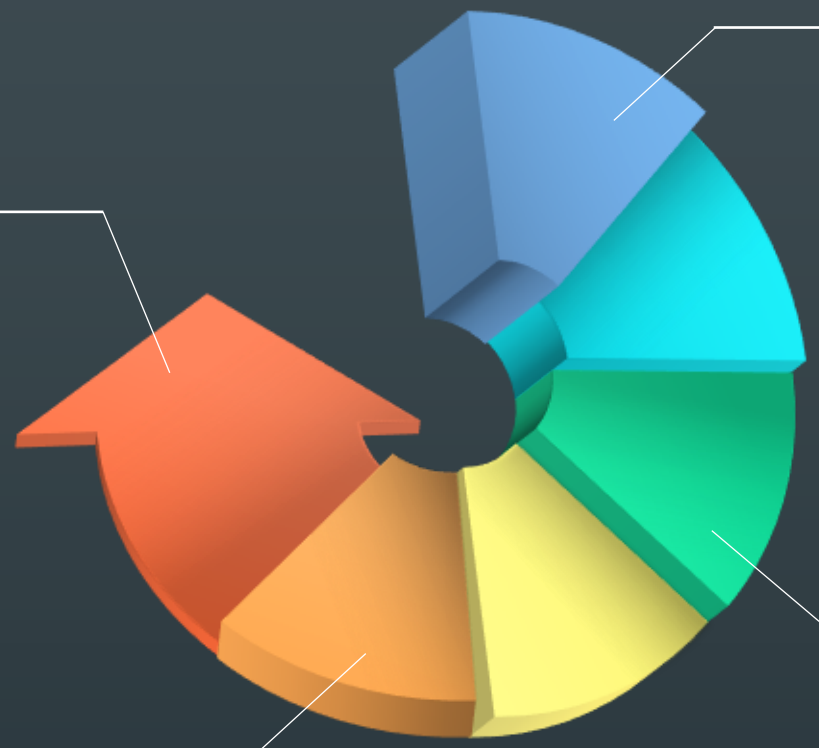
Sales

Flexible Ticket Options: One-way, daily, weekly, and monthly digital tickets .
Bulk Sales: Special deals for businesses (employee transportation).
Student Discounts: Exclusive rates for university students.

Savings per year

Affordable Pricing: Digital tickets offer 15-20% savings compared to paper tickets .
Eco-Friendly: Save on printing costs and reduce paper waste .
Commuter Benefits: Users can save up to 1,200 EGP per year using discounted plans

Adaptive Transport Solutions



Expand

Broaden offerings with smart integrations: Other transport (buses, trains)Accessibility features Loyalty/reward programs.

Monitor

Use analytics to track: Peak travel times Feature usage Drop-off points.

Optimize

Enhance services based on data insights: Improve user experience Adjust schedules and capacity Streamline app navigation.

Outcomes

Maximize user satisfaction and efficiency: Increased usage Better retention Wider reach .

About Egypt 2025

- Egypt's Population (2025): Approximately 118 million
  Urban Population: Over 40% reside in urban areas Cairo
  Metro Annual Ridership (2023): 1.46 billion passengers
  Insight: High urban density and metro usage indicate a substantial market for digital transit solutions.

Secure Funding to Power Our Growth

Founder Effort

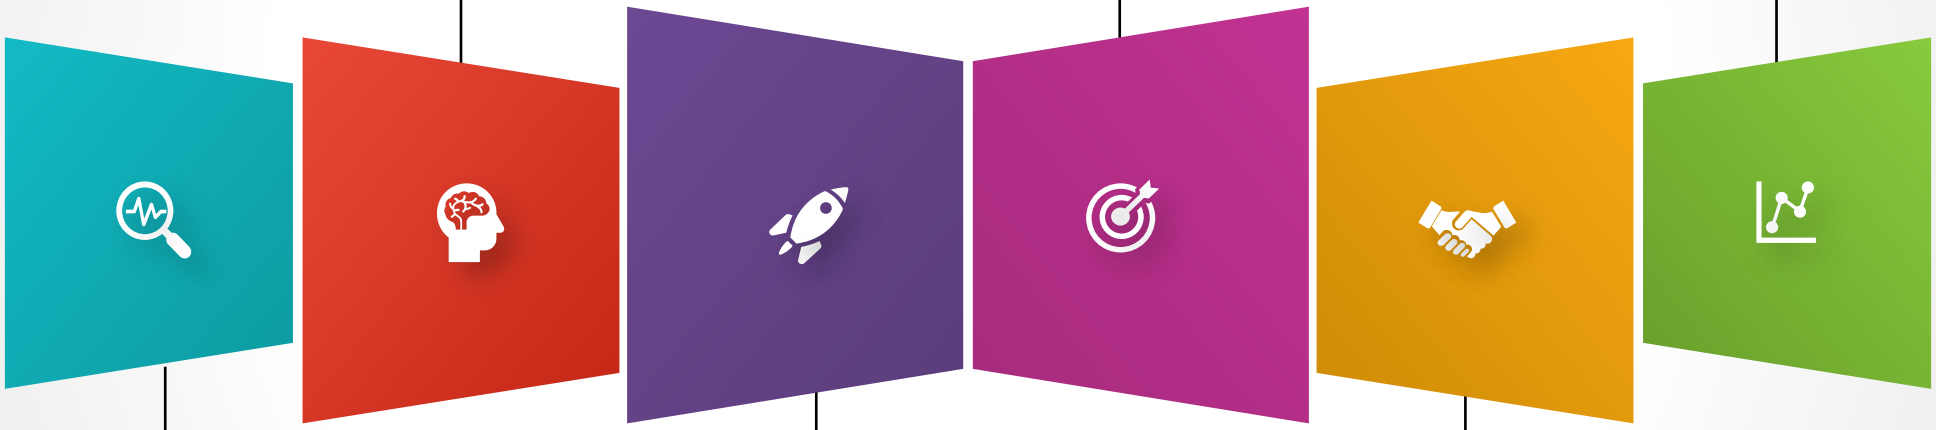
We are using our own money to build the first version of the app.
The goal is to test the idea and show it really works.

Funding

We will talk to investors who support transport and smart city ideas.
They can help us grow in big cities and reach more users.

Growth Metrics

We'll track:
Users per city
Tickets booked



Market Validation

Urban mobility is a massive market.
Daily metro riders = millions .
We proved demand with our MVP & pilot

Accelerators

We will apply to programs like Flat6Labs and Y Combinator.
They give money, help, and connect us to big investors.

Government Grants

Governments want better transport.
We will ask for funding from Egyptian government

Integration Plan

Ticketing system API access – Enable users to buy and validate tickets via the app,. Live schedule integration – Show real-time train status, delays, and estimated arrival times.

Key App Features for Pilot

Trip planning and metro navigation,. Digital ticket purchase and QR validation. Feedback form for passenger experience.

Introduction: Why Partner with Metro Authorities?

Highlight increasing urbanization and the demand for efficient public transportation . Show the user pain points: ticketing queues, schedule confusion, poor digital services . Present the app as a solution to modernize public transit access

Future Vision

Expand to other Egyptian cities: Alexandria, Giza, etc.

Why Scale Globally?

Cities worldwide face similar public transit challenges.
Huge opportunity to become the “Uber for Metros”

Localization

Auto-detect phone language or allow manual switch Local Currencies
Show ticket prices in the local currency.

Benefits to Metro Authorities

Digital transformation and smart city alignment.
Reduce ticket booth congestion and staffing pressure.
Access to user analytics to improve service planning.

Summary points

01

Buy tickets through QR codes and mobile payment

02

Plan routes with real-time schedules and live station data

03

Enjoy inclusive access for people with disabilities and older adults

04

Get alerts about delays , and maintenance

Thank You
